NESP Threatened Species Recovery Hub Adelaide Roadshow

The Threatened Species Recovery Hub of the National Environmental Science Programme invites you to our

Adelaide Research Roadshow

Morning Session: Research in Brief

Join us to hear about our latest innovations in applied threatened species research. Topics will include actions and management of species in South Australia, policy for biodiversity offsets, community engagement, improving monitoring efficiency, and more.

Afternoon session: Stakeholder Workshop

If you have extra time, stay for the afternoon session to discuss the value of our research. Help shape our research outputs and how we engage with specialists and the wider community. Discuss where to next in creating a better future for our unique biodiversity.

Thursday 12th April 2018

Horace Lamb lecture theatre, North Terrace Campus,
Adelaide University

Register online for one or both sessions:
